Governor Dole IS WANTED In Washington

Washington, D. C. Mar. 7, 1902. The Evening Bulletin:—The President has requested Governor Dole to come to Washington. The request was made after a conference with Carter Wednesday evening.

Washington, March 6.—As the result of two conferences with George R. Carter of Hawaii, the President today wired to San Francisco, to catch the steamer Coptic for Honolulu, a dispatch to Governor Sanford B. Dole, requesting him to come to Washington at his earliest convenience to discuss Hawaiian matters.

Governor Dole some time ago expected to come here of his own motion, but later appeared to have changed his mind. The situation in Hawaii is so complicated that the President wants the best light obtainable on the subject. From the latest indications the President will take radical steps in dealing with island politics, and talk of a clean sweep of executive and judicial officials there is unwarranted.

Carter will remain in this country until after Governor Dole's arrival at Washington.

POLICE ON TRACK OF NEGRO FUGITIVE Was Seen By Native In Kalihi This Forenoon.

OFFICERS DESPATCHED, CAPTURE SEEMS CERTAIN
Prison Garb Found Near Makiki Cemetery This Morning—Reward of \$100 Offered By Sheriff Brown.

High Sheriff Brown has offered a \$100 reward for the capture of Fred Wood, the escaped convict.

The negro Wood who escaped from the jail gang at the quarry back of Punchbowl yesterday afternoon, has not yet been captured, although the very best officers on the force have been sent out in various directions where there is a possibility that the fellow might have gone. Additional facts in the case, not already published, are as follows:

Police officers were kept in the vicinity of the quarry throughout the night because from the appearance of things, it was thought that Wood might return to the hut which he had entered for the purpose of fitting himself out with clothes. As it turned out, he did not do as was expected and must have been hiding somewhere in the vicinity when the police arrived on the scene for not more than half an hour after the appearance of the officers of the law were at the quarry. Considering the nature of the country, covered as it is with dense lantana, Wood could easily have concealed himself.

The officers went through the bushes for a half mile around but could find nothing. At night, they spread out and kept watch but much to their chagrin, they found this morning that the negro must have found a loophole somewhere for just above the pound-master's house near the Makiki graveyard, were found the prison clothes of the fugitive. He had evidently stolen a suit of clothes from some place near by and decamped in the darkness of the night.

One of the native prisoners who was working with Wood at the quarries states that he saw the latter go to the closet and then to the water barrel. The last he saw of him was when he was apparently returning to his work.

look pleasant please!

are words entirely superfluous, when taking children's pictures at our studio because we have every facility for interesting them and understand perfectly how to secure the best and most characteristic baby pictures. . . Come and see our sample display.

Many Recommendations MADE IN THE Grand Jury's Report

Offenses—	Arrested—	Convicted—	Dispositions—
Assault and battery	4	3	1
Assault and battery with dangerous weapon	1	1	0
Adultery	1	1	0
Burglary	1	0	1
Disturbance	1	1	0
Drunkenness	4	4	0
Escape from jail	1	1	0
Fornication	8	7	1
Larceny, second degree	9	5	4
Malicious injury	2	0	2
Selling liquor without license	1	1	0
Truancy	1	1	0
Vagrancy (370)	96	55	41
Totals	130	80	50

Of those dismissed, fifteen cases were nolle prosequi, on the understanding that the offenders should find employment on plantations.

From inquiries made from such witnesses as were brought before us, the Porto Ricans as a race appear to prefer occupations bordering on vagrancy to those involving hard work.

We recommend that no further Porto Ricans be encouraged to enter the Territory of Hawaii unless a careful investigation into their character and previous record be made.

Pursuant to the general instructions contained in your charge, the condition of the following public institutions has been looked into: Police Department, Oahu Prison, Reform School, Insane Asylum, Board of Health.

Police Department.—This institution is kept in very good order. The cells are kept very clean, and everything in sanitary condition.

The working of the Department is highly commendable. The High Sheriff called our attention to the existence of gambling in numerous places, chiefly in the courts against the employment of paid informers in their prosecution, this duty of his department is greatly hindered.

Much improvement in this service could be effected, if sufficient funds would be appropriated by the Legislature. At the present time an efficient detective force of two or three competent men is much needed.

Oahu Prison.—The investigation of this establishment resulted very satisfactory and it disproved all rumors concerning the ill-management and care of the prisoners. The buildings and cells, shelters, kitchen and the dispensary are kept in good sanitary condition. The food was of good quality.

The women's department was found to be in as good sanitary condition as the rest of the departments.

The use of dry closets should be discarded and sanitary closets be used.

A sewer pipe should be laid to connect with the King street main.

working majority in opposing any special concession to Cuba or any other foreign country. They are confident, and say they will fight to the last ditch. That is the situation today. What it will be a week hence no one knows. Terrific pressure is beginning to be exerted in favor of some concession to Cuba. It is a battle royal. A person close to the President said today: "The best sugar men are gay today. They have things their way. But they will sing another tune within two weeks. The tariff as affecting Cuba is as sure to be reduced as the sun is to rise tomorrow."

Representative William A. Smith of Michigan had an extended conversation with the President today on the Cuban situation. Smith argued that the signing of agreements at Brussels, whereby the bounties and cartel system are abolished in the principal sugar producing countries, was of the greatest possible benefit to Cuba, giving her free entry into the world's markets on equal terms with other countries. Smith suggested to the President that no action was now necessary by the United States, inasmuch as Cuba will be relieved by the action of the Brussels conference.

The President did not agree at all with Smith, and said he stood just where he had stood before. He did not credit the action of the Brussels conference with as much importance as Smith assigned it.

Secretary Root today ordered Governor Wood at Havana to come to a city at his earliest convenience for the purpose of conferring with the President and the Secretary of War in regard to the necessary steps to be taken for winding up the affairs of the military government in Cuba and the establishment of the Cuban republic. It is believed here that the transfer of government can be effected by May 1st.

Senator Teller today presented in the Senate a memorial from two Colo-

Bounty Scheme IS SIGNED By Conference

Brussels, March 5.—The International Sugar Conference convention was signed today.

Washington, March 5.—The State Department has received a reply from United States Minister Townsend at Brussels, to its inquiry as to the accuracy of the press reports of the results of the conference of representatives of beet sugar producing bounty-paying countries. Mr. Townsend reports that the proceedings were supposedly secret, hence it is not possible to make an official statement of the result of the conference. However, it is the understanding, he says, that the conference have agreed to abolish bounties on beet sugar and to adopt a uniform customs tariff on imports of sugar of \$1.16 per 220 pounds, or about half a cent a pound.

In view of the great importance of the proposed action to the United States Government, the State Department has informed the Treasury Department of the substance of Townsend's advice, and will likewise acquaint the Ways and Means Committee of the House and the Senate, as the majority members of the House are now engaged in considering the propriety of reducing the duty on Cuban cane sugars, a proposition likely to be affected by the European action. For its part, the Treasury Department must plan to remove the countervailing duties on bounty sugar, which action will not depend upon Congressional movement, but will nevertheless considerably affect the customs receipts as a whole.

The Reform School.—At the time of our visit everything seemed to be in a clean and wholesome condition.

A former Grand Jury had criticized the tubs and buckets in the dormitory. These we found have been replaced with patent water closets. We also found improved water closets in the campus, or playground.

Credit Maria.—We also found that the superintendent has recently inaugurated a system of credit marks, a commendable improvement. While the superintendent has no power to remit or shorten a sentence, this method keeps a record of the boy. It also gives a boy some incentive to be good.

We found that there were sixty boys all of whom must be supported upon \$230 per month. The time of our visit was during cold weather. The superintendent informed us that he was short of bedding, but that he did not have the funds to purchase more.

Carpenter Shop.—This we found all but deserted. At present there are but six boys who are enjoying its advantages. We believe that they have a good tutor, a practical carpenter as well as a shipbuilder. This teacher's time is three hours per day, for which he receives \$50 per month.

Another room, which was formerly a sick room, but closed on account of lack of funds, we found given up to "knife work," which is taught in leisure hours, and specimens we saw there, were creditable, and we think the idea of "knife work" a good one.

Food.—There seems to be a great improvement over what was observed a year ago. The food supply consists of pol, beef, beans, salmon and lard, alternated three times a week with bananas, cabbage, sweet potatoes, tea, and hard tack; on holidays, pudding and raised biscuits.

Medical Attendance.—No regular physician is employed, and in cases of sickness the superintendent calls for whatever physician seems to be practicable at the time, and this physician's fees must be paid by the management out of the general appropriation. We recommend that this matter be attended to.

Military Drill.—We were much impressed by the military drill which we found had been inaugurated. The superintendent is embarrassed to provide uniforms by reason of the small appropriation, but the drill seems a very creditable one.

Agriculture.—We also found that one of the awards for good behavior was the privilege of cultivating a small garden bed. These beds looked very neat and well cultivated, the main idea being to induce the boys to pay attention to agriculture. In this matter the superintendent is quite hopeful. He trusts that in a short time the institution can be removed from its present location.

LARGE DEVELOPMENT OF WATER SUPPLY Shown By Report of Manager McStocker of Olaa.

AT ANNUAL MEETING HELD THIS AFTERNOON

A Hundred and Fifty Tons in Twenty-Four Hours Is Capacity of New Mill.

The adjourned annual meeting of the Olaa Sugar Company began at 2 o'clock this afternoon. The reports of the treasurer and manager were presented to the stockholders in printed form. The report of Manager McStocker, which is very complete and exhaustive, is, in part, as follows:

Water Supply.—The water supply of the company has been largely developed during the past year by the extension of previous tunnels and the digging of new ones. One thousand eight hundred and sixty-nine feet of tunnels have been constructed to date. These tunnels all concentrate at one point into a main flume. Extension of the tunnels is still going on.

Flumes.—The main flume from the water head to the cane fields and across the plantation to the Volcano road, has been completed. It meets the Volcano road just above the so-called "Peck road," at about Eighteen Miles, being a little over a mile above Mountain View, approximately ten miles above the mill.

From this main supply flume, two flumes for carrying cane have been constructed longitudinally through the fields to the mill, and a third one will be completed within a month. A fourth will be constructed immediately.

Considerable doubt having been expressed by practical fluming men as to the feasibility of keeping the mill supplied by cane flumes from the distances required, and with the amount of water available at Olaa, I am glad to say that nearly two months' experience has demonstrated the entire practicability of this method of transportation, under the conditions presented at Olaa. In fact, with only one flume in operation, using between four

BIG BENEFIT CONCERT FIGHT WAXES WARM

REPUBLICAN STALWARTS ARE AGAINST CUBA

Decision of European Conference Will Have Far Reaching Effect -- Trend of the Discussion.

Washington, March 7.—A conference of about fifty stalwart opponents of tariff revision met this afternoon in a committee room at the capitol and canvassed the situation. After eliminating doubtful men the whips in charge of the count announced that 109 Republicans stood ready to fight and vote against any reduction or tinkering with the agricultural tariff schedules.

As there are 199 Republicans in the house the friends of beet sugar and other home industries have a fair

chance.

S. S. ALAMEDA, MARCH 19, Next express steamer to the Coast. Express closes 10 a. m. day of sailing.

A VICIOUS DOG.

Hine Luning, a young German, got drunk yesterday and went down to Ala lane with his dog, a brute that has often bitten people and has a record of coming out victorious over many smaller dogs. After having urged the animal to fight a number of dogs, Luning sent his pet after a small canine, the property of Mrs. Susan Chun Poon. The result was that the smaller dog was very badly hurt. Arrest followed and in the Police Court today, Luning pleaded guilty and was fined \$20 and costs.

Simkins—Has Miss Upton's head been turned by the fortune her uncle left her?

Timkins—No; but it has elevated her nose at least thirty-two degrees.—Chicago News.

HAWAIIAN BANDMAN COMMITS MURDER

James Brown, a member of the defunct Royal Hawaiian Band, lately murdered his stepdaughter in Independence, Missouri. After the band came to grief, through the desertion of its leader, on the American tour it was making in 1893, Brown married a negro and settled down in Missouri. Her daughter of fourteen years was the victim of his crime, which he confessed after being apprehended. The authorities had to protect him from threatened lynching by the negroes.

ALASKAN COMING.

The new steamer Alaskan will take the place of the Oregonian sailing from Seattle and Tacoma on the 25th inst. The Alaskan is the new 12,000 ton steamer of the American-Hawaiian Co. and this will be her maiden trip with cargo. The change in steamers was made on account of the great amount of freight offering at the northern ports for these islands. The Alaskan will have a full cargo consisting of about 15,000 tons.

CRITERION OPENING.

Tomorrow at noon Col. C. J. McCarthy will formally open the Criterion Saloon in the Waverly block, corner of King and Bethel streets. From noon until closing time the new place will be open for the inspection of the public who are cordially invited to drop in. At the noon hour a fine cold luncheon will be served and soft drinks dispensed. No liquors will be served nor will there be any in the house until Monday when the opening for regular business will take place.

The Criterion in its new quarters is certainly what its name implies, a standard to go by. The entire furnishings of the saloon are of solid mahogany and plate glass. The fixtures are plain but massive and handsome and the place is up to the standard of any of the San Francisco or Eastern drinking places. The fixtures of the new saloon as they stand are valued at almost \$12,000. Adjoining the saloon on Bethel street a barber shop is being arranged which in interior arrangements and fixtures will vie with the saloon as to costliness.

George L. Dole is improving in the Queen's hospital from his recent severe accident.
